## TECH STACK

JavaScript React Redux  
HTML CSS tailwindcss  
C/C++ SQL

## LANGUAGES

BANGLA: Native

ENGLISH: Full Professional  
Proficiency

## ONLINE-JUDGES

LeetCode | pinto das

HackerRank | Pinto Das

CodeChef | pinto

Codeforces | P-D-5

## PROFILE

My academic journey has equipped me with a strong foundation in programming and web development technologies. In my first two years of university life, I actively participated in online contests and solved around 400 problems with several online judges. I then switch to web development and study the foundations of this field. In addition, I completed a few projects. These days, I primarily use React and Redux for front-end development, troubleshooting issues as they arise. I have an insatiable curiosity for picking up new skills and finding practical solutions to issues.

## EDUCATION

B.Sc. in CSE | Leading University

📅 January 2018 - September 2022

📍 Sylhet, BANGLADESH

- CGPA: 3.69

## PROJECTS

Task Manager | 🔄

📅 2nd, December 2023 - 20th December 2023

- Built a Task-Manager full-stack CRUD application using the MERN stack.
- This application helps users create, update, delete, sort, and filter tasks based on user preference.

E-COMMERCE WEBSITE (E-Cart) | 🔄

📅 February 2022 - September 2022

- Built a Full-stack web application using Django, html, css, and javascript
- This application helps users select electronic items, add them to the cart, and pay through the payment system
- Admin can make a particular user as an admin, change the order status, delete customers and last but not least admin can add products.

Flower Detection (FULL)

📅 January 2021 - May 2021

- Built an Android application using TensorFlow lite model and java
- This application helps users to detect flowers via select gallery photos and also capture a photo
